

## Get knowledge that you can take to the bank.

The FloPro Team is Taco's unique contractor growth and professional development program specifically designed to help you become more efficient by working smarter.

When you join the Taco FloPro Team, you'll gain access to an ever-expanding knowledge base, online training, special events, industry news, customer service, and a community of hydronics professionals just like you.

**Training is the single most important investment you can make, because faster trouble-free installations mean fewer callbacks for greater profitability.**

Join the team today and take your new knowledge to the bank.

# learn it right.

Taco FloPro® Training  
with John Barba

## FLOPROTEAM

Expand your technical expertise and boost your profits with training from Taco, the leader in hydronic systems and components.

Taco FloPro Training is NATE-Recognized and NORA approved

# 2010 Taco Factory Training

## An investment that pays big dividends when you need them – NOW!

Don't waste time learning on the job! Learn in our classroom with hands-on FloPro® Factory Training: authoritative, intensive schooling for FloPro Team members, designed to grow your hydronic expertise as a contractor or installer. FloPro Factory Training equips you to compete on a whole new level by providing the latest in energy saving technology, installation techniques, and profit opportunities.

### The Programs:

#### The "Compleat" Boiler Room (CBR)

This program will show you how to make your boiler rooms outstanding in every way.

*Topics include:*

- Sizing and near-boiler piping for both cast iron and modulating-condensing boilers.
- Sizing and application of circulators and zone valves
- Zoning strategies
- Hydronic electronics

#### Hydronic Control Strategies (HCS)

Hydronic Control Strategies will show you simple strategies that can make a good system great, and a great system utterly amazing! (CBR is a prerequisite)

*Topics include:*

- Adding reset controls to existing, cast iron boilers
- Adding motorized reset valves to mod-con boilers
- Ways to mix water temperatures for radiant systems
- Advanced zoning and variable speed pumping techniques.
- Introduction to Taco's new **iWorx** web-based system controls for residential applications.

#### Hydronic Heat Loss & Design (HHD)

Hydronic Heat Loss & Design will show you where any good hydronics system begins—with heat loss.

*Topics include:*

- How to conduct an accurate, effective residential heat loss analysis using a pencil, paper and a calculator.
- How to use Taco's state of the art FloPro Designer Software.

You will use laptops for hands-on experience with the most advanced, easy-to-use design software in the industry.

### 2010 Factory Training Schedule

February 11 – 12 .....	"Compleat" Boiler Room (CBR)
February 25 – 26 .....	Hydronic Heat Loss and Design (HHD)
March 11 – 12 .....	"Compleat" Boiler Room (CBR)
March 25 – 26 .....	Hydronic Control Strategies (HCS)
April 8-9 .....	"Compleat" Boiler Room (CBR)
April 22-23 .....	Hydronic Control Strategies (HCS)
June 24-25 .....	"Compleat" Boiler Room (CBR)
July 8-9 .....	Hydronic Heat Loss and Design (HHD)
Sept 23-24 .....	Hydronic Control Strategies (HCS)
Oct 21-22 .....	"Compleat" Boiler Room (CBR)

The program is open to any contractor who is a member of the Taco FloPro Team. Tuition for each program is \$289.00 and includes accommodations, ground transportation, meals and extras. Airfare is not included. Please see back panel for details.
